COUNTY POPULATION INCREASES 86,000

Los Angeles County population rose an estimated 86,000 or 1.1% in 1984, reaching a January first total of 7,867,200. Also represented in this latest County total is a post 1980 Census increase of slightly more than 389,800, or a gain of 5.2% in four and three-quarter years. This is a far faster rate of growth than that of the previous decade. During the Seventies, the total increase for the entire ten years was only 435,441, or a gain of 6.2%

The total number of those living in one of the County's 84 cities totaled 6,875,200. This represents a 1984 gain of 108,200, while those in the unincorporated area dropped from 1,014,200 at the beginning of the year to 992,000 at the close, a decline of 22,000. Growth in the many scattered segments of the unincorporated area was not sufficient to compensate for the population transfer of over 37,000 upon the incorporation of West Hollywood.

A major portion of this continuing growth occurred within Los Angeles City. On January first, the City's population totaled 3,123,800, a gain of 26,000 during 1984 and a post 1980 Census increase of 155,200, or 5.2%.

Other cities in which substantial 1980-85 gains were recorded include: Pomona, 14,200, Long Beach 12,700, El Monte 10,200, Huntington Park 9,200, South Gate 7,900, Pasadena 7,600, Alhambra 7,200, Covina 6,800, Baldwin Park 6,600 and Glendale 6,300.

SOURCE: January 1, 1985, Department of Regional Planning. April 1, 1980, United States Bureau of the Census, 1980 Census population counts, as revised.

EIGHTY-FOUR IN "84"

West Hollywood became the County's eighty-fourth city on November 29, 1984. Located immediately north of the Wilshire District, this enclave of 37,000 is bounded on three sides by the city of Los Angeles and on the fourth by Beverly Hills. The new city, whose western section was once called Sherman, encompasses such well known places as the Sunset Strip, Decorator's Row, Samuel Goldwyn Studios and the Pacific Design Center.

Eight-five percent of the city's 24,500 housing units are in apartment structures which range in scale from the simplest of triplexes to prestigous high-rise towers. Therefore, it is not surprising to note that West Hollywood has the distinction of possessing, at 1.61 persons, the smallest average household size of any of the eighty-four municipalities in Los Angeles County.

West Hollywood is the third community to incorporate since the 1980 Census. It follows the formation of a municipal government in Westlake Village on December 11, 1981 and that in Agoura Hills on December 8, 1982.

RESIDENTIAL UNITS ENTERING INVENTORY INCREASE 19.4%

Residential construction picked up in the second half of 1984. The Department estimates that the net number of new units constructed and ready for occupancy during the second half totaled 11,625. This is an increase of 19.4% or 1,892 more units than in the first half.

A substantial part of this moderate gain can be attributed to a 46.2% jump in single units entering the inventory which in the second half totaled 3,689 as compared with 2,524 in the preceding six months. This brought to 6,213 the total number of single units added in 1984.

During this same period, multiple units added totaled 7,914. This represented an increase of 10.6% or 761 more units than were added in the first six months. Although this was a much smaller percentage of increase than shown for singles, in terms of comparative volumes, it is obvious that multiple unit projects continue to be the favored choice of this County's homebuilders. A look at the record shows that more than 70.5% of all units added to the housing supply

INVENTORY INCREASE (Continued from Page A)

since the 1980 Census have been in multi-unit structures. This continues a trend which is now more than a quarter of a century old.

The Department estimates that at the beginning of 1985 the countywide housing inventory consisted of 1,718,110 single, 1,118,884 multiple units and 45,017 mobilehomes. These latest figures represent an overall increase of slightly more than 98,500 units since the 1980 Census.

A QUESTION OF COMPARABILITY

Questions occasionally arise as to the comparability of the net unit changes as reported in this publication and units authorized as reported in the Security Pacific Bank publication "California Contruction Trends" (1), while others confuse these two with Housing Starts as reported by the Bureau of the Census in their continuing series, "Current Construction Reports, (C20) Housing Starts" (2).

Units authorized are exactly that, a statement of the number of units approved for construction by the issuing agency for a specified period of time.

Housing Starts recognize a second element, the time lag which exists between the issuance of the permit and the start of construction. Some prefer this series in that the units are not reported until the start of construction. This estimated point is based upon the tracking of a sample of permits from issuance to ground breaking. A recent study found that 95% of all units are started within 90 days of the date the permit is issued. it should be noted that total Housing Starts in California are always slightly below those for permits.

Although recording procedures differ, the objective of these two series is the same, the measurement of the volume of new units entering the housing market.

The number of units added, as used in this publication, involves both elapsed time and an additional concept, net change. Simply defined, net change is the difference between the number of units added through new construction and alteration or moved on, and those removed through demoliton and alteration or moved out. These units are held in the file and not reported until their actual or estimated completion date. The basic thrust of this approach is to replicate, as closely as possible, actual changes in the county's housing inventory.

Clearly, units authorized, housing starts and net units added record residential construction at different points along the same time line. However, users of the three series must keep in mind that they are not precisely comparable, nor interchangable. Rather, each represents a different approach in measuring residential construction and evaluating changes in the housing supply.

(1) A series which reports monthly construction activity for each county and city in California.
(2) A monthly series which reports Housing Starts for the United States regions and states. This publication does not include information below the state leve.

POPULATION AND HOUSING NOTES

Incorporation:

The incorporation of West Hollywood on November 29, 1984 fostered a change in a long standing policy. For the first time, a new city was not assigned a new Statistical Area number. Inasmuch as the boundaries of the prior unincorporated community and the new city are identical, the previous designation, S.A. 15.2, was retained.

Thus, West Hollywood's 3,762 single and 20,746 multiple units were simply moved from unincorporated to incorporated status.

Annexations:

Eight single and 16 multiple units were transferred from SA 7.521 (Covina Islands) to SA 7.2 (Covina); 8 single units from SA 7.512 (Glendora Islands) to SA 7.4 (Glendora) and 15 single units from SA 34.241 (South Whittier) to SA 34.31 (Santa Fe Springs).

Adjustments:

The program to remove duplicated building records from the file was completed. Removed in this second phase were 34 single and 188 multiple units. This brings the total removed to 153 single and 587 multiple units.

ADDITIONAL HOUSING TABLES AVAILABLE

The following January 1985 housing tables are now available for purchase:

Parts 3 and 4
Housing Units by Type, Statistical Area and City. (14 pages) Price: $1.50. $2.50 mailed.

Part 5
Housing Units by Type, Statistical Area and Census Tract. (79 pages) Price: $4.50. $6.60 mailed.

Part 6
Housing Unit Changes by Type, Statistical Area and Census Tract. (338 pages) Price: $17.50. $20.00 mailed. (This report shows net construction and units annexed by Census Tract)

Please make your check payable to: **County of Los Angeles.**
